

International API Interface File

Fixed parameters

Location	Parameter	Illustration	Type	Required
Header	app_id	Only id	String	Yes
Header	nonce	Random string	String	Yes
Header	time_stamp	Current timestamp (valid for 10 minutes)	String	Yes
Header	Sign	Sign	String	Yes
QURy Parameter	Version	Version	String	Yes

Signature Generation Rules:

Request Header Parameters + Request Request Parameters + Request Body

Encrypted by app_secret

```
public class SignUtil {

    private static final String HMAC_SHA1 = "HmacSHA1";
    private static final String ENCODING = "UTF-8";

    /**
     * Sign
     * **/
    public static String generateSign(SortedMap<String, String> parameters,String body, String secret) {

        StringBuilder sb = new StringBuilder();
        // All parameters involved in parameter transfer are sorted according to accsii (ascending order)
        for (Map.Entry<String, String> entry : parameters.entrySet()) {
            String v = entry.getValue();
            if(StringUtils.isNotBlank(v)) {
                try {

                    sb.append(entry.getKey()).append("=").append(URLEncoder.encode(entry.getValue(),
ENCODING)).append("&");
                } catch (UnsupportedEncodingException e) {
                    e.printStackTrace();
                }
            }
        }
        if(sb.toString().endsWith("&")){
            sb.deleteCharAt(sb.length()-1);
        }
    }
}
```

```

    }
    if (StringUtils.isNotBlank(body)) {
        sb.append(body);
    }
    byte[] enString = new byte[0];
    try {
        enString = HmacSHA1Encrypt(sb.toString(), secret);
    } catch (Exception e) {
        e.printStackTrace();
    }
    return DigestUtils.md5DigestAsHex(enString).toUpperCase();
}

public static byte[] HmacSHA1Encrypt(String encryptText, String encryptKey) throws Exception {
    byte[] data = encryptKey.getBytes(ENCODING);
    //Constructs a key from the given byte array, the second parameter specifies the name of a key
    algorithm
    SecretKey secretKey = new SecretKeySpec(data, HMAC_SHA1);
    //Generates a Mac object specifying the Mac algorithm
    Mac mac = Mac.getInstance(HMAC_SHA1);
    //Initialize the Mac object with the given key
    mac.init(secretKey);

    byte[] text = encryptText.getBytes(ENCODING);
    // Complete Mac operation
    return mac.doFinal(text);
}
}

```

Return parameter

code: 0 Success 1 Failure

1 Obtain device information

Post <https://4020y425z1.uicp.fun/open/getMachine>

Parameter	Illustration	Type	Required
machineNo	Device Number	String	NO
username	User Name	String	NO
servicePhone	Service Hotline	String	NO
isFault	Fault (0 normal 1 fault)	String	NO
isEnabled	Enable (0 off 1 on)	String	NO
Current Page	Current page (default 1)	String	NO

Page Size	Page size (default 10)	String	NO
-----------	------------------------	--------	----

1.2 Return result

3 Obtain slot commodity of machine

Post <https://4020y425z1.uicp.fun/open/getProduct>

3.1 Request parameters

Parameter	Illustration	Type	Required
Machine No	Device Number	String	Yes
Current Stock	Current Stock	Integer	No
Line Number	Slot Number	Integer	No
Current Page	Current page (default 1)	String	No
Page Size	Page size (default 10)	String	No

3.2 Return result

```
{
  "code": 0,
  "data": [
    {

},
    "msg": "success"
}

```

The slot ID and slot number must be returned, and other fields will not be returned if the product is not added in the background (the product ID does not indicate that the product is not set, there may be a product ID but no image, and no product map is set).

4 Create an Order

Post <https://4020y425z1.uicp.fun/open/createOrder>

4.1 Request parameters

Parameter	Illustration	Type	Required
appVersion	Version (fill in v1.0.1)	String	Yes
buyNum	Purchase quantity (default 1)	String	Yes
machineNo	Device Number	String	Yes
machineLineProductId	Slot commodity ID	String	Yes
payType	Payment method (1 WeChat, 2 Alipay, 3 face recognition, 4 offline, 6paypal)	String	Yes

4.2 Return result

```

{
    "code": 0,
    "data": {
        "delFlag": 0,
        "id": "612294c8525eb7a51f46edb59636b728",

    "purchaseNum": "1",
    "retailPrice": 0.02,
    "duePrice": 0.02,
    "actualPrice": 0.02,
    "payType": "6",
    "payState": "0",
    "payMode": "2",
    "orderType": "3"
  },
  "msg": "success"
}
```

5 Equipment shipment

Post <https://4020y425z1.uicp.fun/open/shipment>

5.1 Request parameters

Parameter	Illustration	Type	Required
Order No.	Order Number	String	Yes

5.2 Return result

```
{
  "code": 0,
  "msg": "success"
}
```
